SUMMARY

Results-oriented B.E. student specializing in Artificial Intelligence and Data Science with practical experience in machine learning, web development, and automation. Proficient in Python, Flask, and data-driven system design, consistently delivering impactful project implementations through strong team collaboration.

EDUCATION

Pune Vidhyarthi Griha's College Of Engineering (PVG COET), Pune 2022 – Present
B.E. in Artificial Intelligence and Data Science — CGPA: 7.42

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS, C++
Frameworks/Libraries: Flask, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Selenium, Bootstrap
Tools & Platforms: Git, MySQL, AWS EC2, VS Code, Chrome DevTools, Jupyter Notebooks, Google Colab
Core Concepts: Machine Learning, Web Development, REST APIs, Data Processing, Explainable AI (XAI), Behavioral Bot Detection

EXPERIENCE

Sanyu Infotech Pvt. Ltd.

Machine Learning Intern

- Developed **PopcornPicks**, a production-ready movie recommendation system using Flask and TensorFlow, leveraging embedding-based similarity on 50,000+ movies.
- Integrated TMDB API for real-time movie metadata retrieval, significantly improving recommendation relevance and user engagement.
- Designed and deployed a full-stack application with a Flask backend and responsive frontend, hosted on Render for continuous availability.

PROJECTS

Passive CAPTCHA Detection System | *Live / GitHub*

Technologies: Flask, Python, Machine Learning, Selenium, MySQL, HTML/CSS/JS

- Engineered a passive bot detection system to reduce user friction by 75% by eliminating traditional active CAPTCHAs for UIDAI-style web forms.
- Collected and trained on 1,000+ simulated human and bot interaction sessions using Selenium, achieving 92% classification accuracy.
- Built a complete end-to-end solution with a Flask backend, MySQL database, and responsive frontend to log, analyze, and classify user behavior in real time.

CERTIFICATIONS

Fundamentals of Deep Learning – NVIDIA

Building a Chatbot using Watson Assistant – IBM

CO-CURRICULAR ACTIVITIES

Core Member, Event Organizing Team, Samsara '23 (Annual College Fest) – Supported planning and execution of 10+ events

NSS Volunteer – Assisted in organizing blood donation camps, contributing to the collection of 100+ units of blood.

Sports: Represented School in Basketball and Table Tennis; District-level Skating player.
